Management Practices for Engineered Rights of Way within GWPAs

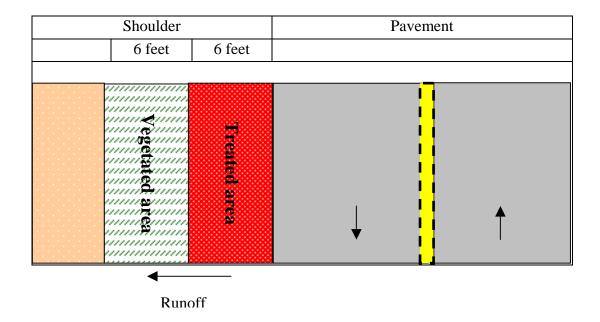

"Engineered rights-of-way" means areas within a ground water protection area that are constructed in a way that results in increased runoff and collection of storm water, such as railroad ballasts and berms, public roadsides, and highway median strips or similar areas, but not canal or ditch banks or utility lines.

Choose one of the following management practices:

Management practices for runoff GWPAs Choose any of the management practices specified for runoff GWPAs

2. Vegetated area

Manage any runoff from the treated right-of-way so that it passes through a noncrop fully vegetated area adjacent, and equal in area, to the treated area, <u>or</u>

3. Stormwater permits.

Comply with any permit issued pursuant to the storm water provisions of the federal Clean Water Act pertaining to the treated area; <u>or</u>

4. Alternative management practice

Implement an alternative management practice that has been approved by the Director (check with county agricultural commissioner).
